

*"I have worked in partnership with DCL Security for many years and I am delighted with the service they deliver. I know that I can trust them completely to keep the shop safe and secure."*

**Billy Kay, Store Manager**

**Combining a local approach on a global scale.**

SPAR UK was set up in the UK in 1957 and has grown significantly since then. Servicing more than 2400 shops and employing over 50,000 people in the UK today SPAR is now the world's largest international food retail chain.

At the heart of the SPAR business model is a partnership approach. They combine the independence of individual SPAR members with the advantages of being part of a global brand. They work hard to deliver the right combination of product and price, tailored to suit each local market place.

This commitment to partnership and the flexibility to offer a tailored approach was also what they were looking for when they needed support with shop security in Greenock, Inverclyde. DCL Security was able to provide the level of service they needed at the right price, helping them to focus on their core business of food retail, relaxed in the knowledge that the shop is safe and secure.

*"Running a shop is challenging and fast-moving, it is great to know I can focus on my customers knowing that DCL Security have all aspects of safety and security in hand".*

**Billy Kay, Store Manager**
